 Chennai, Indi

PROFESSIONAL SUMMARY

Detail-oriented Software Test Engineer with over **3.7+ years** of experience in Manual and Automation Testing at Cognizant. Skilled in Selenium with Java, Agile practices, and end-to-end QA processes across web and mobile platforms. Recognized for team leadership, defective resolution efficiency (20% faster turnaround), and Best Employee awards for consecutive years. Delivered reliable, high-quality software solutions through successful completion of key projects. Collaborated with interdisciplinary teams to deliver multiple successful projects while ensuring system integrity and optimal performance.

Work Experience

Programmer Analyst

Cognizant Technology Solutions | Chennai

Dec 2022 – Present

Project Role: Test Automation Engineer

Project Role Description: Leveraged advanced quality assurance processes, automation tools, and best-in-class methodologies to drive transformation of software testing products and solutions, leading

end-to-end quality engineering teams with a dedicated focus on automation to optimize control, accuracy, and data integrity.

Key Responsibilities:

- Independently led testing initiatives and established subject matter expertise by implementing multiple
- process improvements. Consistently contributed key insights and actionable recommendations to team meetings, enhancing collaboration and project outcomes.
- Delivered impactful solutions to complex work-related issues, resulting in improved efficiency and faster defect resolution.
- Developed and maintained automated test scripts to ensure comprehensive coverage and identify critical issues early in the development cycle. Analysed test results and communicated feedback to development teams, enabling continuous product and process enhancement.

Professional & Technical Skills:

- Demonstrated expertise in test management tools and processes.
- Applied test automation frameworks including Selenium and JUnit to streamline testing workflows.
- Utilized industry-standard software testing methodologies such as Agile and TDD, ensuring adherence to best practices for quality assurance.
- Executed performance testing using tools like JMeter and LoadRunner to validate system reliability.
- Integrated tests within CI/CD pipelines, accelerating release cycles and reducing deployment errors.

Bug Tracking & Management:

Utilized Jira for defect lifecycle management, enhancing traceability and issue resolution.

Automation Expertise:

Developed Selenium-based automation scripts with Java and conducted mobile testing using HeadSpin.

Professional Experience:

Possess more than three years of hands-on experience in software quality assurance.

EDUCATION

➤ **PG- University of Madras**

Master of Computer Applications (MCA) | Chennai, Tamil Nadu Sep 2023 - Oct 2025

Project: Developed a web-based application utilizing .NET and MS Access as part of the MCA program (Distance Education),.

➤ **UG- Meenakshi college for Women**

Bachelor of Science in Physics | Chennai Apr 2019 - 2022

➤ **Velankanni Matriculation Higher secondary School**

High school | Chennai Apr 2015 - 2019

Skills

Hard Skills

Manual Testing, Regression Testing, Functional Testing, Performance Testing, User Acceptance Testing (UAT), Test case Development, Test Planning, Test Strategy development, Test data management, Test environment setup, Test scenarios, Test validation, Test verification, Requirement analysis, Selenium with Java, Mobile test ing using head spin, API testing, UI automation testing, Test Automation, Jenkins, GitHub, Jira, Defect life cycle management, Test Management, Performance testing tools, Jira.

Soft Skills

Leadership qualities, Team leadership, Collaboration, Effective communication, Problem solving skills, Result oriented, Commitment to quality, Sincere in Attitude, Sincere in Responsibility, Presentation Skills, Trouble shooting, Taking up Challenges, Learn new technologies

Accomplishments

Engaged in the Verizon project focusing on mobile and online application testing

QA Automation Engineer with over 3.6 years of experience leading successful software testing initiatives and delivering robust automated solutions across diverse domains and projects.

Effectively balance manual testing expertise and advanced automation skills by leading both the development of automated test scripts and the execution of comprehensive manual test plans.

Project Experiences

Led a testing team of four members

Contributing to successful deliveries and various Test management

Engaged with Agile and Scrum frameworks

Actively contributing to sprint planning and daily stand-up meetings.

Identified and systematically documented over 500 Defects/issues.

Contributing to a 20% reduction in time to resolution.

Experienced in manual, API, and UI automation testing.

Strong specialization building scalable, maintainable, and high-performing test suites.

Skilled at integrating test automation into CI/CD pipelines using Jenkins and GitHub

Enabling continuous testing and providing real-time feedback to stakeholders.

Created reusable scripts with Selenium-java for regression and integration testing

Decreasing regression test duration by 35%.

Proficient in Selenium with Java

Possessing practical knowledge in scripting web-based applications for comprehensive automation.

KEY ACHIEVEMENTS

- Chosen as the Best employee for the years 2022-2023 and 2023-2024
- Implemented new features without any escalations.
Acknowledged with several appreciation emails from clients and team members.
